BENKERTBÄNKE

Excellence through innovation.

An idea is only as good as its implementation.

That is why Benkert Banke not only does planning and design under one roof, but also the complete production process.

Working exclusively with stainless steel, each item is crafted at its Königsberg, Germany facility.

During design and production, two key factors are followed which ensure a perfect product: innovative technology and hand-finished products. Only when both of these factors are combined can a durable, sustainable product evolve. That is why Benkert Banke's outdoor furniture is the most cost-effective solution in the long-term.

Appreciation for good design, hard work and frugality are deeply rooted in City Design's DNA. 150+ products and many projects later they still live and breathe well-designed, affordable site furnishings.

City Design's extensive range of products allows one to think in terms of the complete "look and feel" of the urban space, not simply design great street furniture. City Design thinks of themselves as "street stylists" playing with different colors, textures, and finishes to maximize opportunities and choice to create a unified & unique space.

Starting with the basic idea that simplicity wins over complexity each time around, they have brought everything from design to manufacturing, to customer service in-house to eliminate any inefficiencies or unnecessary levels of uncertainty. Having everything "under one roof" helps save clients' time, resources and makes each step pleasantly smooth and predictable.

With each new product, there is a focus on making it useful, affordable and unique. To City Design, this is the essence of "smart design", because while trends and forms may change, quality and value never go out of style.

LAB23 offers a varied range of products – benches, litter bins, bollards, planters, bike racks, and tree grates – for a total of about 200 products meant for both public and private clients. All products are characterized by a contemporary design combining rigid, essential shapes with soft and sinuous ones with high-quality, high-resistant materials that require very little maintenance costs. To achieve this, LAB23 chooses materials like galvanized steel, stainless steel, and hardwood.

The Venetian company boasts collaborations with internationally renowned designers like Zaha Hadid, Stéphane Chapelet, Roberto Semprini, Fuksas and Karim Rashid and offers the skills of many other qualified designers in order to create customized products. Each product is carefully studied, from the conceptualization to the execution, from the assembly to the installation, by their technical department, which ensures quality of the final product.
